

**Report “Videos explaining to minors
how to freely access online the
content of OnlyFans and other
pornographic websites”
-Executive Summary-**

The Audiovisual Council of Andalusia (ACA), in accordance with its remit to protect minors from harmful audiovisual content and concerned about the defencelessness of kids when confronting Internet pornography, has published a report on **"Videos explaining to minors how to freely access online the content of OnlyFans and other pornographic websites"**. This report has been prepared in order to verify the existence on the Internet of videos explaining how to access adult content on sites such as *OnlyFans* and other pornographic websites available over social media.

The starting point

To carry out this review we analysed 35 videos mostly aimed at showing how to watch audiovisual material for adults. Searches relating to the subject on YouTube resulted in the discovery of a series of videos regarding which it can be confirmed that, in effect, they offer information about the ways and applications through which, without controls or filters, adult content of a markedly sexual nature, hosted by the social network *OnlyFans*, can be freely accessed. The checks carried out allow us to confirm that the solutions offered by the tutorials of some YouTubers we traced about how to watch *OnlyFans* content have the aim of explaining how videos and photos existing on the application itself (and which on *OnlyFans* can be accessed through payment and subscription), **can be freely viewed through alternative routes, using other applications or websites, and free of charge.**

The OnlyFans social network

OnlyFans is a social network of British origin used to distribute and consume exclusive and "à la carte" content, of a varied nature, from sports, entrepreneurship, food, or art to content of a sexual nature. The popularity of the latter has undergone a huge boom, and it could be said that, at present, it is plentiful on this social network. Furthermore, two types of users coexist on this platform: fans and creators. Both are present in a dynamic allowing exclusive content to be produced and consumed, with the peculiarity that the creator can adapt to requests from certain users, thus creating a form of **on-demand content, consumed in exchange for payment**. Unlike most social media, which can be accessed from the age of 13 onwards, **OnlyFans is a platform that bans access to those under 18**, and this is indicated in its terms and conditions policy.

According to the opinion of several experts who took part in the recent conference organised by the ACA addressing the defencelessness of minors to Internet pornography, *OnlyFans* is a social network allowed and legitimised, in part, due to the social context in which our young people live today. A **hypersexualized environment** normalising certain behaviours and, use of language and lifestyles that encourages girls, particularly girls, to find in this type of platform a new way of generating a quick and easy income, through exploiting their bodies.

Methodology

Video searches were carried out mainly on *YouTube* and *Facebook*. To locate this content, search engines were used, including Google and those from the *YouTube* and *Facebook* websites themselves. The material located was published between 2020 and 2023. The results have also disclosed some websites offering similar findings. Thus, it has been decided to include some web pages in this report even though, not being audiovisual material, they are still relevant to the object of the same, since they are written material referring to audiovisual material. Therefore, tracking the information distributed through these websites, either via informative articles, tutorials, or forums, the same type of content to which the located videos lead can be accessed; that is, **audiovisual material with sexual and pornographic content, unsuitable for minors, without there being any form of age checking system in place**. It can be seen that searches have revealed a considerable amount of information hosted on seemingly innocuous websites, presenting various written solutions to the issue of how to view, without prior payment, or a subscription and, therefore, unlimitedly and with no age restrictions, adult content, either on *OnlyFans* or on other platforms.

Some websites to be considered

The videos located offer solutions and tutorials aimed at unblocking the adult content hosted by the *OnlyFans* social network. But not only this, but during subsequent checks it has been observed that over the Internet it is possible and straightforward to find this type of content no matter how protected it is on its social network of origin. And not only *OnlyFans*, but following the clues given by the videos, **a huge amount of pornographic material can be accessed online, and minors are not prevented from accessing it**.

CumTube and *PornHub* are other most visited websites. Some videos point to these apps for viewing adult content. The aim is to download videos with erotic and pornographic content. *Pornhub*, in addition to being a download app, is also an Internet pornography website based in Montreal, Canada. It is the tenth most visited website in the world, according to the description published on Wikipedia.

On the other hand, *Dirtyship*, *Famousinternetgirl*, *Nsfw247.to* and *Prothots*, are pornographic content platforms, where, among other things, content leaked from *OnlyFans* creators can be found. They are accessible without any warnings regarding age checks.

Some of these platforms have a section where you can read the names of people whose content can be located.

Furthermore, we added *Reddit*, a social network composed of a massive collection of forums, where people, following registration, can share news and content, in addition to commenting on other people's publications. Viewing content or reading comments would not require registration, although some communities on *Reddit* may require you to be of full age or pre-register to view their content. Some specialised websites call *Reddit* **“the most important forum in the world.”**In videos, *Reddit* is one of the most frequently mentioned platforms for finding *OnlyFans* and adult content, and it has no restriction other than giving an assurance that you are of full age. Following the guidelines indicated in the videos leads to successful registration and ways to access this content. It can be accessed via a mobile phone or a computer. It would only require knowing the name of the person you are looking for, for example, an *OnlyFans* actress, which is not difficult. In fact, people specifically look for videos from certain creators – they seem to be videos mostly starring women –. Not everything that can be found on *OnlyFans* can be found there, only what has been leaked from the platform.

On *Reddit*, you can find all kinds of content in general. The searches carried out for preparing this report have allowed us to locate, in particular, a video covering the content of a *Reddit* forum in which sadomasochistic relationships (BDSM, an acronym of the English terms Bondage, Discipline, Domination, Submission, Sadism and Masochism) are discussed. The video does not contain images but displays a succession of superimposed texts that advance set to music. They reproduce what users have asked or raised about this issue on a forum. A voiceover reads out the texts.

YouTube clearly sets out its 'Community Guidelines'¹ so that “banned” content does not find a place on it.

YouTube has always had Community Guidelines describing what type of content is not allowed on it. These policies apply to all types of content on the platform, including videos, comments, links, and thumbnails. Community Guidelines are a key part of the [broader set of policies](#) and are regularly updated in consultation with external experts and *YouTube* creators allowing it to keep pace with emerging challenges.

These Community Guidelines are enforced through a combination of human reviewers and machine learning, and apply to everyone equally, regardless of the topic or background, political viewpoint, position, or affiliation of the creator. The policies aim to make *YouTube* “a safer community while giving creators the freedom to share a wide range of experiences and perspectives.” This is stated on the platform itself.

Concerning [Nudity and sexual content](#), *YouTube* states:

¹<https://support.google.com/youtube/answer/9288567?hl>

“Explicit content meant to be sexually gratifying is not allowed on YouTube. Posting pornography may result in content removal or channel termination. Videos containing fetish content will be removed or age-restricted. In most cases, violent, graphic, or humiliating fetishes are not allowed on YouTube.

If you find content that violates this policy, report it. Instructions for reporting violations of our Community Guidelines [are available here](#). If you have found a few videos or comments that you would like to report, you can [report the channel](#).

Sexually explicit content featuring minors and content that sexually exploits minors is not allowed on YouTube. We report content containing child sexual abuse imagery to the [National Center for Missing and Exploited Children](#), who work with global law enforcement agencies.”

The point of arrival

Finally, it seems appropriate to point out that, when preparing this report, the materials under review have also been searched for using simple Google search engines, and therefore this has yielded numerous outcomes. Given that listing them all or even exhaustively is not the aim of this work, it should be sufficient to highlight that from these written articles located on websites, many of them specialising in digital issues, or from journalistic daily news platforms, it has been possible to obtain information similar to that from the videos. And, sometimes, this information was more complete, given that the written article could reliably be of greater length.

We highlight this issue because, even in the case of written material hosted on general websites, it is information that refers to pornographic audiovisual content, unsuitable for minors, but which is accessible without any restrictions or, at most, through a system based on clicking on a statement to say you are of full age. Therefore, the content to be found on these websites is on the same level as that to be found in the videos.

Significantly, many of these pages and articles aim to publicise a reality that can be worrying for large technology companies, such as the fact that applications or networks like *OnlyFans*, are no longer secure, these same articles offer pointers and solutions regarding the applications or sites through which that content can be accessed. Furthermore, if this information has been published, it is because the operational rules of the networks themselves have been breached or because users leak and publish such content on other sites, which also have commercial interests.

One of the aspects to be highlighted is that both the videos located, and the multiple written articles that are simply placed on the Internet, is the ease with which, through the private messaging app *Telegram*, this being one of its great attractions, you can

access a multitude of groups distributing pornographic material, either from *OnlyFans*, or any other platform.

Locating these groups seems simple, either from the app itself or through a computer. Anyone can check how to locate groups or access them from a computer. These articles explain that to join these groups, if they are private, an invitation must be received given that they are confidential, while public groups are monitored.

A minor with a mobile phone that can install *Telegram*, or which already has *Telegram* installed, could access all this content and, even if their settings block it, there are ways of learning how to unlock it through tutorials found via video, via the Internet.

We have also found information on some websites with informative text content that shows what is being explained and which, furthermore, have provided more information about how to view *OnlyFans* content in other places outside said platform, how to locate Telegram groups, -- "the best groups"—with this type of content, that *Reddit* freely allows adult content to be viewed or which platforms offer this same type of content, not necessarily from *OnlyFans*. They offer specific information, for example, that **Coomer, is a public database for OnlyFans**. You can find on this page the paid content of many content creators of the popular adult social network. The people responsible for leaking the content to this website are the users themselves, who can upload the photos and videos of *OnlyFans* accounts to *Coomer* anonymously so that anyone can see them for free.

Regarding *Twitter*, sources consulted indicate that it is known as "the porn haven beyond *OnlyFans*", so that although the social network has tightened restrictions around fake news and violent content, it has not done the same with pornographic photographs and videos. It is reasonable to say, therefore, that *Twitter* has become **one of the last refuges for X-rated content**.

Likewise, as has been pointed out, there is talk that *Telegram* is the other haven. Public channels are monitored, which means pornographic, or terrorist content or breaches of intellectual property rights will be grounds for blocking. However **private channels are confidential and encrypted**. This means that not everyone can view them, being only accessible through a link or an invitation from the administrator.

In closing, it should be noted that during the final review of this report, we have been able to verify that **YouTube has removed three videos** that did not comply with the platform's Community Guidelines.
